Department of Veterans Affairs

Data Architecture Service Business Concept Layer

February 11, 2008

Bringing VA Data Resources Together

1 DAS Business Concept Layer (BCL) Summary

The Department of Veteran Affairs (VA) has joined with other federal efforts to define a common framework or reference model to be used in describing organizational data. The Federal Enterprise Architecture (FEA) Data Reference Model (DRM) has been defined by the Office of Management and Budget (OMB) as a means to provide a common, consistent way of categorizing and describing data to facilitate data management, data sharing and integration. The FEA DRM uses data models to show the categorization of data and the relationship between these categories. Development of a DRM is a true Enterprise-level endeavor that achieves optimal success when participation occurs at that level. Such participation and success result when a common set of standards for supporting dialogue and collaboration is established at the onset.

Version 2 of the FEA DRM highlighted the importance of relating the data to its business context. This was defined as a Business Context Layer (BCL). The first activity for the development of a VA BCL was the mapping of the Business functions and system information from the VA EA 4.3 to a DAS developed OneVA data classification.

The BCL consists of:

- 1) An activity summary (above)
- 2) Data Classification Summary
- 3) OneVA Business Sub-Function Mapping to Data Classification
- 4) System Inventory Mapping to Data Classification

2 OneVA Data Classification Summary

Entity Name Entity Definition

ASSET

BUDGET

CLAIM

DIRECTIVE

A resource for supporting the activities of contracting, assuming or acquiring possession of goods and services. Solicitation

ACQUISITION and procurement are examples of related data resources.

Adjudication may lead to a benefit award.

A legal process by which VA claim judges review evidence and argumentation including legal reasoning set forth by

APPEAL benefit claimants to come to a decision which determines claimants' eligibility to benefits.

A resource describing attributes of something of value or an option for potential value; e.g. land, structures, equipment,

intellectual property, software, available money.

A resource documenting the oversight, formulation, and execution of the VA budget. In addition the resources for the

accompanying financial analysis and any resulting services.

A resource for documenting the nature and scope of benefit claim filed by veterans. Documenting Veteran-specific

information used in assessment of the CASE, to help fraud detection, and the Line of business involved in the CLAIM.

The set of organizational regulations, standards and procedures exercised by management to provide strategic direction and

ensure objectives are achieved, risks are managed appropriately, and resources are used responsibly.

EMERGENCY REGIME - A system of rule, government, or administration. A resource for documenting the development,

EMERGENCY REGIME coordination, and implementation of programs that enhance VA's ability to respond to a contingency.

FACILITY - A place planned or constructed for a specific activity. A building, structure, Plant, complex, or arena. E.g.:

VA Central Office,

FACILITY Benefit Offices, Cemetery, Medical Facilities (Outpatient Clinic, VISN Office, Hospitals, Vet Center).

The resource for management of money or other assets, esp. those in the public treasury.

FINANCE The monetary resources of a person or institution such as a bank, government, or VA.

This resource documents the health care lines provided by VA to America's veterans, and related medical and social

support services.

HEALTH CARE Some examples: Preventive care, ambulatory, medicine, diagnostics and treatment services.

The goods on hand for supporting the mission of VA. For example: Medical equipment, blood bank, pharmacals and

INVENTORY supplies.

A resource representing or supporting, the outlay of money usually for income or profit, capital outlay; also the sum

invested or the ASSET acquired.

INVESTMENT E.g. Initiatives of VA in capital investment and investment control.

Bringing VA Data Resources Together

Entity Name	Entity Definition
LABORATORY	A laboratory where tests are done on biological specimens in order to get information about the health of a patient. These tests are performed to determine pathology of a patient or determine the effective of treatment.
LOCATION	A named physical site that can be referenced by a set of coordinates. Area of Responsibility (AOR): A distinct geographic part or section for which an organization is designated responsibility or accountability. This includes Geographic Area and Region.
	High-level project management and coordination, reporting and strategic planning all programs, policies, plans,
MANAGEMENT	regulations, and directives relating to veteran's compensation, pension, and other related benefits.
MEDICAL	This resource documents the health care lines provided by VA to America's veterans, and related medical and social support services. Some examples: Preventive care, ambulatory, medicine, diagnostics and treatment services.
	Matters dealing with death and dying. For example. Burial and benefits.
MEMORIAL	Presidential Memorial Certificates and Markers
ORGANIZATION	A resource representing an administrative or functional entity established to represent interests or issues or to conduct an activity as an activity, as opposed to an individual or person representing oneself.
PARTY	A person or organization involved with, affected by, interested in, or otherwise of interest to the Department of Veterans Affairs.
PATHOLOGY	Pathology is the medical specialty which uses tissues and body fluids to obtain clinically useful information for diagnosis of disease for a VA patient.
PERSON	A resource identifying an individual with whom VA interacts in some manner or has interest in collecting biometric data. Examples are Supervisory Veterans Claims Examiner, Supervisory Veterans Service Representative and Beneficiary.
	A framework of goals to be achieved, which will serve as a basis for defining and planning for specific VA services as
PROGRAM	directed by federal law, policy or executive directive.
PROPERTY	The sum total of items owned; possessions collectively; such as real property, chattel, holding or intellectual property.
PROSTHESIS	Prosthesis is an artificial extension that replaces a missing body part which is provided at part of treatment to a VA patient.
	The collective resources supporting mission consisting of commodities and human capital. The commodities for act or
RESOURCE	process of controlling, directing or governing the source of aid assets, both monetary and no monetary.

Entity Definition Entity Name A resource for a service, or sum of money that enhances the well-being of a veteran or eligible dependent; For example: <Compensation>: A monetary benefit service administered by the VA codified in laws and regulations: Compensation assists veterans who have suffered a loss or a reduction of earning potential because of service-connected disabilities. It also compensates the spouses and dependents of veterans whose deaths occur due to service-connected disabilities. <Rehabilitation> A VR&E Service mission is accomplished by providing a range of direct and supportive services. These services include: Comprehensive evaluation of rehabilitation needs (vocational or independent living); training and employment services to obtain/maintain suitable employment; and independent living services (to include training and specialized equipment) to attain independence in activities of daily living. <Memorial > Matters dealing with death and dying. For example. burial and benefits. <Veteran Education> A benefit by which the Veteran is encouraged and enabled to develop their innate potential, by acquiring knowledge, and **SERVICE** skills through teaching and learning. A field of knowledge concerned with the use of industrial arts and applied science to achieve practical objectives. Services or products required for information processing. TECHNOLOGY A resource for the act of providing discipline or instruction to a person or animal. E.g.: VA police officer training program. Veterans are trained as part of the benefit program. The organization that provides training. **TRAINING**

The resources required to undergo transportation, as in a vehicle, for VA individuals.

A resource identifying a means of conveyance or travel from one place to another E.g. Ambulance conveyance or travel.

4 OneVA System Inventory Mapping

Syste m Id	System Name	System Description	Entity Name
1005	Automated Certificate Eligibility	A web application that allow lenders to generate on-line Certificate of Eligibility (COE) and retrieve limited loan information from the Automated Loan Processing System (ALPS).	SERVICE
1009	Automated Loan Production System - Loan Processing	ALPS-LP is a case management tracking system for VA Home Loan processing at VA Regional Loan Centers. ALPS is a client/server, GUI-based application updating VBA's Oracle Corporate database. Supports of the Loan Guaranty (LGY) program.	SERVICE
1013	Web Automated Folder Processing System	WEB Application that automates various file maintenance projects (XCR, CH30, DEA, CER retirement projects, and folder relocation (REL)) for inactive folders located at the ROs. This application replaces AFPS.	EMERGENCY REGIME
1017	Automated Reference Materials System	An application runnin in the Regional Operations Centers that provides search capability to VBA publications, directives, manuals, circulars, etc.	DIRECTIVE
1022	Beneficiary Identification and Records Locator System	BIRLS is a legacy IBM mainframe application that processes on-line inquiry and updates, controls number assignment and different folder-type management, stores inactive compensation, pension and education data and insurance policy numbers.	SERVICE
1024	Burial Operations Support System	This Oracle database application supports interment-related activities at national and state veterans' cemeteries. Closely aligned to AMAS.	MEMORIAL

Syste m Id	System Name	System Description	Entity Name
1025	Automated Monument Application System	This Oracle database application supports monument ordering and tracking. Closely aligned to BOSS.	MEMORIAL
1042	Capital Asset Management System	This system captures, tracks and evaluates all VA capital asset initiatives within the Department. CAMS interfaces with various VA computer systems that contain data and information needed to manage VA's capital assets and financial systems.	ASSET
1045	Compensation and Pension Records Interchange	A web application that provides a Graphic User Interface (GUI) for VistA AMIE II (Automated Medical Information Exchange) files. The GUI replaces the entire VBA functionality in VistA AMIE II and the Patient Information Management System (PIMS).	SERVICE
1047	Chapter 32 Accounts Receivable Program	One of the Education Service Applications. Maintains and tracks Chapter 32 accounts receivable debt collection at Regional Offices (ROs). CARP enables operators to query the database for the specific conditions that prompt collection letters.	SERVICE
1059	Certificate of Eligibility	COE supports determination of eligibility for Loan Guaranty benefits, prints and records appropriate forms and letters, and provides reporting capability.	SERVICE
1060	Chapter 1606 - Montgomery GI Bill Selected Reserve (MGIB-SR) Benefits Payment System	This software application assists eligible service members to further their post-high school education by providing educational assistance. The Chapter 1606 system provides educational assistance to a selected reserve of the Armed Forces.	SERVICE

Syste m Id	System Name	System Description	Entity Name
1063	Chapter 30 PC Payment System	This PC client system builds BDN payment transactions for flight, apprenticeship, on-job-training, and correspondence benefits. See the mainframe service under CH 30.	SERVICE
1064	Chapter 31 - Vocational Rehabilitation	This system provides Chapter 31 major vocational rehabilitation and employment benefits. Chapter 31 is a benefit program designed to provide subsistence income supplement to veterans who have suffered a service-connected disability.	SERVICE
1065	Chapter 32 System	Processes Veterans Educational Assistance Program information.	SERVICE
1066	Chapter 35 System	Chapter 35 provides up to 45 months of education and training benefits to eligible veterans' dependents.	SERVICE
1067	Chapter 35 Alternate Input Replacement System	CHAIRS is a Windows-based application, which performs additional Chapter 34/35 transactions that cannot be done in BDN. It allows the RPOs and Manila to remotely log on to the Hines BDC to enter Chapter 34/35 transactions.	SERVICE
1068	Chapter 30 - Montgomery GI Bill (MGIB) Active Duty Benefit	Chapter 30 is a contributory system for Veterans who entered military service after July 1, 1985. Central data base masters are updated upon authorization of the award. On-line processing generates payment records for Treasury and Letter records.	RESOURCE
1078	Control of Veterans Records	A MS Windows-based client/server application using bar code technology to support RO and RMC folder activities, including requests, mail, search and external transfer. The current release applies to Claims folders, Temp folders, and NOD folders.	MANAGEME NT
1080	Corporate WINRS	A re-engineering and enhancement of the LAN-based WINRS application. Finance functions have been added for monitoring and making payments incurred under the Vocational Rehabilitation Program. It is a comprehensive case management system.	SERVICE

Syste m Id	System Name	System Description	Entity Name
1084	Condo PUD (Planned Unit Development) Builder	CPB is a public Internet site that allows people to look up information about VBA approved Condominiums, PUDs, and Builders. Condo and PUD is not updated.	SERVICE
1090	Legacy Decision Support System	The Decision Support System (DSS) enables the Veterans Affairs hospitals to compute their costs for treating individual patients and providing specific services for management and quality improvement purposes.	FINANCE
1094	Enrollment Certification Automated Processing:	One of the Education Service Applications. Processes education awards based upon electronic enrollment certifications and notices of change in student status, received from educational institutions via VACert.	SERVICE
1099	Electronic Contract Management System	This E-Commerce project is designed to introduce electronic contracting solutions in VA contracting operations. It provides the tools and procurement data that allow VA contracting professionals to make informed buying decisions.	ACQUISITION
1100	Electronic Lender Folder	Maintains lender files and information, and enables the majority of lender processing functions to be automated. Enables Loan Guaranty staff to track lender patterns and deficiencies and identify problem lenders.	ORGANIZATI ON
1118	VHA Enrollment Database	Enrollment Database (EDB) is the redesigned HEC database. The EDB will include flexibility to meet critical requirements on a timely basis, safeguards to meet security requirements, and improved reliability.	PERSON
1121	Document Management System	The DMS is system designed for document processing and management requirements.	FINANCE
1123	Electronic (Webbased) Travel System	Zegato e-Travel, web-based COTS system.	TRAVEL

Syste m Id	System Name	System Description	Entity Name
1127	Fiduciary Beneficiary System	FBS provides an on-line method for input and retrieval of master record and work process data for use by the F&FE personnel for the control and maintenance of incompetent beneficiary cases.	SERVICE
1133	Loan Guaranty Folder Retirement System	LoFRS provides automated support for loan folder retirement processes. It consists of PC and handheld components.	EMERGENCY REGIME
1137	Health Claims Processing System	HCPS is an integrated end-to-end medical claims payment processing application. It currently supports services provided by the FSC to the Department of Immigration Services. However, it is capable of supporting additional customers in the future.	FINANCE
1138	Health Data Repository	The HDR will provide a repository of clinical information normally residing on one or more independent platforms for use by clinicians and other personnel in support of patient-centric care.	HEALTH CARE
1140	HealtheVet / VistA / MyHealtheVet	The services framework depicts a logical representation of applications and services that comprise the to- be HealtheVet.	TECHNOLOG Y

Syste m Id	System Name	System Description	Entity Name
1142	Health Eligibility Center	The Health Eligibility Center (HEC) is responsible for determining eligibility of veterans for VHA medical care. The HEC is the authoritative source on Veteran Eligibility and subsequent Enrollment. To be enrolled, a veteran must meet basic eligibility criteria. The HEC gathers all the information needed to make eligibility decisions and records and processes the information using the HEC System. The HEC also: • Validates Social Security numbers from the Social Security Administration • Verifies incomes from the Internal Revenue Service and Social Security Administration • Receives information from VBA on veterans to determine eligibility and enrollment assignment • Is the authoritative source and Data Steward for Demographic, Eligibility, and Enrollment data. This does not include Patient Identity elements. • Provides Business oversight to all software products related to Registration, Eligibility and Enrollment. • Shares Eligibility and Enrollment Data with all sites that have treated the veteran. • Is the authoritative source for Eligibility, Enrollment, and Income Verification Matching. • Validates social security number of veterans. • Prioritizes all enrollees and confirms their eligibility for the VHA medical program. 89VA19	PERSON
1159	License and Certification Approval Systems	A VBA Internet/Intranet application that maintains information on organizations that are seeking approval under 38 U.S.C. 3689, which authorizes VA to pay the cost of licensing and certification tests.	MEMORIAL
1179	Order Management Control Software	OMCS is proprietary software (that resides on a SCO UNIX OPERATING SYSTEM) that interfaces with Pharmaceutical Dispensing Machines to automate the filling of patient prescriptions at VA Consolidated Mail Outpatient Pharmacy (CMOP).	INVENTORY
1180	On-Line Approval File	One of the Education Service Applications. A system that maintains approval information on schools and job training establishments	ORGANIZATI ON

Syste m Id	System Name	System Description	Entity Name
1186	Patient Financial Services System	PFSS is targeted at reengineering & upgrading specific VistA applications in order to capture accurate patient billing data in a timely fashion. A secondary component of the program is the Clinical Indicator Data Capture (CIDC) project.	FINANCE
1187	Personnel Information Exchange System	A client/server application designed to improve the quality and timeliness of requesting veteran information from outside agencies. Information is used to process claims for: compensation, pension, education, burial benefits, and loan guaranty.	PERSON
1193	Prisoner of War Database	POW tracks the level of service received by former POWs from the VA. Code sheets are converted to e-input and process via COBOL programs to edit input, update the POW master file create a listing of valid transactions/POW master records.	PERSON
1205	Reinstated Entitlement Program for Survivors	REPS legislation was originally passed as an amendment to public Law Program for Survivors 97-377. The restored benefits are funded by the Department of Defense and administered by the VA.	SERVICE
1213	Service Medical Records Tracking System	The Service Medical Record Tracking System (SMRTS) is an online-automated system that is the receipt, control, maintenance, and disposition of the service members' records.	PERSON
1214	VETSNET Share System	SHARE is a computer application built with Windows-based color screens that a Regional Office employee can use to establish claim data.	CLAIM
1218	State Benefit Reference System	A system of references for all the veterans' benefits programs in each state. In addition to describing benefits and eligibility criteria. Information is also provided on VA facilities, as well as certain state and local resources.	SERVICE
1219	Statistical Technical Accuracy Review	Used to record both local (Regional Office) and National (C&P Service) case accuracy reviews of rating, authorization, and fiduciary. A VBA Intranet database application that tracks applicant folders for Fiduciary STAR reviews.	CLAIM

Syste m Id	System Name	System Description	Entity Name
1224	Training and Perfomance Support System	TPSS is a family of Computer Based Training (CBT) programs that combine interactive CBT and electronic support with small group cooperative learning events. The training focus is subject matter associated with a job.	TRAINING
1228	Credit Card System	The CCS is a major application that processes three different types of transaction data for Prime Vendor, Purchase Card, and Centrally Billed Travel. Prime Vendor, Purchase Card, and Travel data.	FINANCE
1235	Vendor Inquiry System	VIS enables VA's vendors to make online inquiries to determine status of their payments and to request information on previous payments made.	FINANCE
1237	Veterans Assistance Discharge System	VADS is designed to disseminate information to all recently discharged veterans on VA benefits and entitlements. The system generates data that is used to help place veterans in jobs related to service training.	SERVICE
1239	Veterans Examination Request Information System	The VERIS Scientific package is a multifocal visual evoked potential system that includes software for mfERG and mfVEP recording.	FINANCE
1242	Veterans On-Line Applications	This website and application suite allows veterans and service members to apply for compensation, pension, education, vocational rehabilitation, and employment benefits via the Internet.	SERVICE

Syste m Id	System Name	System Description	Entity Name
1244	Virtual VA	Virtual VA is an online electronic work environment (EWE) designed for processing veteran Compensation and Pension (C&P) claims. Hard-copy claims folders are transformed into "e-folders" using imaging technology. Using Virtual VA, a Document Capture Technician prepares and scans original veteran benefits claims and/or pension maintenance documentation into electronic folders. The Document Capture Technician also performs quality assurance work on all imaged documents. The system then stores the images and facilitates the gathering of documents such as veterans' applications, awards, medical and dependency records, etc. The hardware and software (servers) associated with these functions are located in the three pension management centers. In addition, the electronic folders will be permanently stored on optical jukeboxes at this same location. A master folder index is maintained in Philadelphia. Implementation of Virtual VA provides simultaneous user access to a veteran's electronic claims folder along with the same level of record integrity that exists in the paper environment Veterans are able to get quicker and more accurate answers when requesting the status of their claims. Virtual VA eliminates the need to locate the paper file, which saves valuable time and gets the customer his/her answer in seconds to minutes rather than days to months.	SERVICE
1245	The Veterans Information Solution	VIS2 is a web-based application that provides a consolidated view of comprehensive eligibility and benefits utilization data from across VBA and DOD.	PERSON
1246	Veterans Integrated Health Information System	The VistA (Legacy) system is the operating system software platform and the technical infrastructure (associated with clinical operations) on which the VHA health care facilities operate their software applications.	HEALTH CARE
1247	Vocational Rehabilitation & Employment Review of Quality	The ROQ intranet site captures and collects data to reflect quality of delivery of services to Chapter 31 veterans.	SERVICE

Syste m Id	System Name	System Description	Entity Name
1249	WINRS (current)	Corporate WINRS is a comprehensive VR&E case management system which maintains complete case histories, generate forms and letters, control authorizations and payments.	MANAGEME NT
1251	Web Automated Verification of Enrollment	One of the Education Service Applications. A web-based application that allows students to electronically verify their school enrollments each month.	SERVICE
1253	XCMI	A web-based application that keeps track of who has done training	TRAINING
2502	Health Care Resources Sharing	The Health Care Resources Sharing database is used to track and monitor the status of legal and technical reviews of proposed contracts from VAMCs. These contracts with non-federal entities concern the buying and selling of medical services	ACQUISITION
2503	Lockbox, First Party	Lockbox provides improved first-party medical debt payment processing. The Lockbox system is designed to handle only first-party medical debt payments	FINANCE
2504	National Laboratory Workload and Laboratory Management Index Program	Effective management of Pathology and Laboratory Medicine Service (P&LMS) laboratories requires indicators capable of demonstrating each individual laboratory's productivity and efficiency.	PATHOLOGY
2509	VA National Clozapine Registry	The VA National Clozapine Registry tracks the health and demographics of patients who have been prescribed clozapine by the VA. Clozapine, or the brand name Clozaril, is a drug used to treat the most serious cases of schizophrenia. Unfortunately, clozapine may also affect portions of the blood, lowering the body's resistance to infection and sometimes creating life-threatening circumstances. Realizing the severity of the problem, the Food and Drug Administration (FDA) established guidelines for analysis of White Blood Cells and Neutrophils and set strict minimum limits. The FDA also mandated that any manufacturer of clozapine must maintain a Clozapine Registry. These registries are to track the location and the health of clozapine patients and to ensure "weekly White Blood Cell testing prior to delivery of the next week's supply of medication". To date, the clozapine manufacturer registries have been unable to develop sufficient controls to meet these requirements, especially the ability to prevent dispensing clozapine when blood results are abnormal. However, because of the unique structure of VISTA, the VHA obtained permission from the FDA and clozapine manufacturers to use its in-place computer network to gather and evaluate weekly patient information, then export this data to manufacturer	LABORATOR Y

m Id

Syste System Name System Description Entity Name

clozapine registries. The VA assigned functional administration of this effort to the National Clozapine Coordinating Center (NCCC) located in Dallas, Texas. Weekly data on each VA clozapine patient is processed at two locations. Facility Level -- When a clozapine prescription is written, a computer program in each facility's internal computer system retrieves white blood cell count, neutrophil count, and clozapine dose and evaluates the information according to FDA guidelines. If an adverse blood condition is found, the computer may warn to trigger a physician reevaluation, or lock out entirely to prevent dispensing, depending on the severity. Weekly, this information, along with certain patient demographic information, is gathered locally and transmitted to Hines Office of Information Field Office for centralized storage. This data can only be accessed by the NCCC. National Level - Information on the clozapine patients' prescriber, clozapine dose, white blood cell count, and neutrophil count is downloaded from the Hines OI Field Office database on a weekly basis. An ancillary computer program reformats the data and evaluates the information for inconsistencies and data gathering errors. The computer-corrected data is manually compared with hand-written facsimile information sent to the NCCC by each site. This manually corrected data is again reformatted for data storage in MS Access format at the NCCC. The corrected data is also reformatted into ASCII fixed-length fields and transmitted via modem to the manufacturers' Clozapine Registry and, in turn, to the FDA. Provides data on VA clozapine patients required to meet national commitments to the FDA and manufacturers' clozapine registries. Provides the best possible safety for VA clozapine patients by using a unique interlock at the pharmacy level which permits, warns, or prevents clozapine from being dispensed in accordance with current FDA guidelines for white blood cell count and neutrophil count, resulting in the safest domestic clozapine dispensing program available. Provides for secure communication between the NCCC and local computers, without violating local security restrictions. Makes basic demographic data, white blood cell counts and, since 1999, neutrophil counts, for over 4000 patients who have tried clozapine in over 120 domestic VA hospitals, available for research purposes. Saves millions of dollars a year for the VA (\$8 million in 1998) in the form of lower drug costs from the manufacturers, who deduct the cost of clozapine monitoring from their regular prices. 121VA19

Syste m Id	System Name	System Description	Entity Name
2511	VA Drug Pricing Database	The VA Drug Pricing database contains the current prices for pharmaceuticals purchased by the federal government. These listed prices are based on the Federal Supply Schedule (FSS). This database is mandated by Public Law 102-585, the Veterans Health Care Act of 1992, which sets the maximum amount that a drug may be bought for by the VHA. The source of this information is contained in printed contracts or data files supplied by the drug manufacturers, representing the pricing agreements between VHA and the manufacturers. Price data is input by the National Acquisition Center (NAC) into the database administered by the Pharmacy Benefits Management Strategic Healthcare Group. Information from this database is published on the World Wide Web at the following site: http://www.dppm.med.va.gov. The users of this database include pharmaceutical manufacturers, drug wholesalers, and those who purchase pharmaceuticals for the VHA. Provides current government drug prices. Provides World Wide Web users quick and easy access to the information. Provides the information in dBASE III file format for use by most PC-based database and spreadsheet applications.	INVENTORY
2512	VA/DoD Sharing	The VA/DoD Sharing Database was originally developed to provide the VHA and the Department of Defense (DoD) software for recording, tracking, and compiling reports from the information generated by joint VHA and DoD activities.	HEALTH CARE
2518	Former Prisoner of War Statistical Tracking System	The Former Prisoner of War (POW) Statistical Tracking System database is a registry designed to comply with Public Law 97-37, the Former Prisoner of War Benefits Act of 1981.	PERSON
2520	Bed Control Database	The Bed Control database records the levels of operating beds and of authorized beds at each VAMCs, and tracks requests for changes in these levels.	INVENTORY
2522	Community Residential Care Report	The Community Residential Care Report is a listing of all facilities approved for care by the VA. Information about these facilities is entered into the Fee Basis module of the Veterans Health Information Systems and Technology Architecture (VISTA).	ORGANIZATI ON
2524	Drug Accountability Database	The Drug Accountability database is a database that collects information on medication dispensed to both inpatient and outpatient veterans. Information for the Drug Accountability database is extracted from the VISTA environment.	HEALTH CARE

Syste m Id	System Name	System Description	Entity Name
2617	Agent Orange Registry (AOR)	The Agent Orange Registry (AOR) is a dataset of veterans who served in the Republic of Vietnam between 1962 and 1975, veterans who served in Korea during 1968 or 1969, and any U.S. veterans who may have been exposed to dioxin or other toxic substance in a herbicide or defoliant, during the conduct of, or as a result of, the testing, transporting, or spraying of herbicides for military purposes and have had a registry examination. This registry program was set up to address the concerns of Vietnam veterans about the possible long-term health consequences of exposure to herbicides specifically Agent Orange. Agent Orange was a herbicide, or defoliant, which was used in Vietnam to kill unwanted plant life and to remove leaves from trees that provided cover for the enemy. Agent Orange was a mixture of chemicals containing equal amounts of two active ingredients, 2,4-D and 2,4,5-T. The name, "Agent Orange," came from the orange stripe on the 55-gallon drums in which it was stored. Other herbicides, including Agent White and Agent Blue, were also used in Vietnam to a much lesser extent. The AOR is centrally housed and maintained at the AAC. Registry data is entered via a website. Processing of the data occurs nightly. The primary users are the Office of Public Health and Environmental Hazards, Environmental Agents Service, and Environmental Epidemiology Service. This registry enables the VA to keep veterans informed on research findings or new compensation policies through periodic newsletters. It provides a mechanism to catalogue prominent symptoms, reproductive health, diagnoses and to communicate with veterans. The voluntary, self-selected nature of the registry makes it valuable for health surveillance; however, it is not designed or intended to be a research tool and therefore, the results cannot be generalized to represent all Vietnam veterans' illnesses. The primary users are the Office of Public Health and Environmental Hazards, Environmental Agents Service, and Environmental Epidemiology Service. It provides	PERSON
2636	Allocation Resource Center	Online system used to classify, by type of care, all veterans' inpatient and outpatient service for the fiscal year.	SERVICE

Syste m Id	System Name	System Description	Entity Name
2640	ARMS (Automated Reference Materials System)	The automation of VBA-produced reference materials such as Circulars, Manuals, and Handbooks. Other reference materials produced outside of VBA include Title 38 Code of Federal Regulations and court of Veterans Appeals.	DIRECTIVE
2643	Annual Report of Residency Training Programs (ARRTP)	This database enables electronic, paperless reporting of this information from VA Medical Centers to the VISN and from the VISN to the Office of Academic Affiliations on training information.	DIRECTIVE
2647	Addiction Severity Index	The Addiction Severity Index (ASI) records and stores information about veterans with substance abuse problems. Substance abuse patients are administered a standard questionnaire of approximately 200 questions.	PATHOLOGY
2649	Automated Safety Incident Surveillance Tracking System	The Automated Safety Incident Surveillance and Tracking System (ASISTS) is a repository of VHA employee accident data. While many types of accidents are captured, the primary focus of the ASISTS database is to track and to report on employee exposures to blood borne pathogens through needle sticks, sharps, and bodily fluids. Data is captured locally at medical centers using the ASISTS package in VISTA. On a monthly basis, extracts from this local data are sent to the national database via MailMan messages. The central repository is maintained by the Veterans Integrated Service Network (VISN) Support Service Center (VSSC) located in Austin, Texas at the AAC. Customized reports needed by the users are produced and placed on the VA intranet accessible from the VSSC Web page. The primary users of ASISTS include the Occupational Safety and Health Administration (OSHA), VA Headquarters, the directors of the VISNs, Occupational health and safety professionals located at each medical facility, and the VSSC. Fulfills reporting requirement mandated by OSHA. Will identify trends and proactive strategies for preventing needle sticks and other exposures to blood borne pathogens. Web-based reporting capability for creation of reports depicting accident data on a national, VISN, and facility level. Creation of reports depicts accident data on a national, VISN, and facility level. Accident data can be compared between VISNs and facilities. 99VA131	RESOURCE

Syste m Id	System Name	System Description	Entity Name
2832	Creutzfeldt-Jakob Disease Lookback Dataset (CJDLD)	The tracking system is for patients identified in the Creutzfeldt Jakob Disease (CJD) lookback notification initiative established in January 1995 as part of the lookback notification of all Department of Veterans Affairs (VA) patients who may have received certain lot numbers of blood derivatives or blood components produced from donors with CJD. Even though the Centers of Disease Control and Prevention characterized the risk of transmission of CJD from blood derivative products as 'small and immeasurable' and 'theoretical', VA believed it had an ethical obligation to inform patients of the exposure to potentially contaminated blood components or plasma derivative products while under VA's care. The patients were notified. The VHA established a tracking system for individuals who received these products to determine if there was an increase in VA CJD cases. Every two years (odd years), the Infectious Diseases Program Office requests from field facilities through the appropriate Network Office an update on the status of patients who had previously been identified through the VA CJD lookback notification initiative. The Infectious Diseases Office receives the information and provides summary reports to the VHA Chief Patient Care Services Officer. The CJDLD is a retrospective collection of data and requests for individual reports are not accepted. The CJDLD is dependent upon data input from individual VHA medical facilities that is used by the Infectious Diseases Program Office to update the CJDLD. The tracking system is an epidemiological tool to determine if patients in the dataset have an impact on VA CJD cases nationwide. 121VA19	PATHOLOGY

2949	Dental Encounter System (DES)	Dental Encounter System (DES) is an automated health care application designed to capture critical data about the operations of VA dental services. Information on completed procedures is gathered for each patient encounter through the Dental Record Manager software, which is a VA CPRS enhancement. This DES information is linked and includes encounter date, patient, provider, procedures, diagnosis codes, and additional associated qualifiers. DES productivity is measured using weighted work units known as relative value units (RVUs). One RVU represents one minute of the average national provider's time and is reported as a value with each procedure reported to DES. DES transactions are sent to the AAC database using standard HL7 messaging and the VA Vitria Interface Engine. These batched HL7 messages are parsed at the AAC and placed in a flat database file maintained by the AAC. DES provides a detailed combined inpatient and outpatient dental treatment database for all completed treatment provided at VA clinical sites. The AAC DES database serves as the feed for the VA Decision Support System. The local DES VistA files will also provide the dental data feed for the VA Health Data Repository (HDR). Local and national static DES reports are available through DRM or from the AAC DES database. Local and national analytics are available using the data from the AAC DES database to populate a relational database that is analyzed with ProClarity software.	HEALTH CARE
2969	Disease Management/Practice Management Database	Provider and disease management system	MEDICAL
2972	Donated Leave Program	The application tracks leave donated to authorized employees.	RESOURCE
2974	Debt Management System	This system manages the communication of VHA first party debts referred to the VBA Debt Management Center for debt collection activities.	FINANCE

2986	Distribution of Operational Resources	Integrates workload, quality, and fiscal data for VBA operations. The purpose of the system is to relate the cost of operations to other operational performance data for analysis at the regional office level.	MANAGEME NT
2995	DSS Dental Record Manager	Automated system to assist dentists to document the care of patients in clinic.	HEALTH CARE
2996	DRM	DSS GUI software - Dental Record Manager	MANAGEME NT
2998	Dental Program	Dental Interface to VistA	HEALTH CARE
3001	DSS	The Decision Support System (DSS) enables the Veterans Affairs hospitals to compute their costs for treating individual patients and providing specific services. It also allows the review of financial and clinical corporate data for management and quality improvement purposes. It provides information for clinical studies on groups of patients and more. At each VAMC a client/server-based application provides a Graphic User Interface for the presentation of data. Information is sent from the VAMC to the AAC for processing and storage in the corporate database. The VISTA DSS Extracts module provides a means of exporting data from selected VISTA software modules and transmits it to DSS at the AAC. This transfer is accomplished through a set of extract routines, intermediate files, audit reports, transmission, and purge routines. In addition to VISTA extracts as input data, DSS uses corporate financial data from databases that reside at AAC and clinical data from the National Patient Care Database (NPCD). Information from the VISTA packages is stored by extract routines in intermediate files where it is temporarily available for local use and auditing. The data is transmitted to the AAC where it is formatted and uploaded into the commercial DSS software. After the data has been successfully uploaded into the commercial software, it is purged from the intermediate files. Extracts information from the following VISTA software packages: • Audiology and Speech Pathology (Quasar) • Clinic No-shows• Dental• Event Capture • Inpatient Medications • Laboratory• Outpatient Pharmacy • Patient Information Management System (ADT and Scheduling Modules)	MANAGEME NT

3101	External Review Mgmt Information System (ERMIS)	The External Review Management Information System (ERMIS) tracks reports and recommendations from the Office of Inspector General (IG), the General Accounting Office (GAO), and other external review organizations. ERMIS contains 5 main components: Joint Commission for the Accreditation of the Health Care Organization (JCAHO), IG, GAO, VSO (Veterans Service Organization), and other survey organizations. All IG, GAO, and Medical Inspector (MI) program report recommendations, action plans, status reports, and anticipated completion dates are entered and tracked by Veterans Affairs Central Office (VACO 105E). Information including actions and outcomes can be transmitted electronically to oversight organizations. Provides review management information pertinent to inspections conducted by the following survey organizations: JCAHO, IG, GAO, VSO, and others. Provides service-level worksheets for recommended action plans. Provides a tracking mechanism for all other reviewing bodies. Provides communication between the site, region, and VACO on all action plans. Provides the following standardized reports in addition to an ad hoc reporting mechanism: • Recommendation & Camp; Action Plans Report by Service • Delinquent Report • Audit Reports Unresolved Over Six Months • Unimplemented Recommendations for One Year	MANAGEME NT
3146	Federal Assistance Awards Data System	Reports the distribution of VA assistance and award monies by state and county.	SERVICE
3148 3152	FASTPASS Federal Computer Assisted Payment Processing	Employee Photo ID system Automates accounting data entry to CAPPS for Federal purchases.	RESOURCE FINANCE

Syste m Id	System Name	System Description	Entity Name
3153	Non-VA Fee Basis Medical System (FEE)	The Fee Basis Medical and Pharmacy System (FEE) automates the VHA Fee for Service program. It authorizes and pays private physicians, hospitals, and pharmacists for products and services provided to veterans approved for the program. Veterans are reimbursed through FEE for medically-related expenses including travel. Information is entered into the FEE system through VISTA online menus. FEE is run at the AAC and interfaces with the Financial Management System (FMS), the Beneficiary Identification and Records Locator System (BIRLS), and the Automated Management Information System (AMIS) and its successor, the VHA Work Measurement database (VWM), to produce payments, accounting updates, and reports. FEE facilitates money management, master record updating, and input error resolution. Daily reports indicating all payments processed and erroneous input transactions are transmitted to approximately 170 VAMCs. Letters are sent to veterans on a monthly basis detailing payments made on their behalf to Fee for Service providers. Monthly, quarterly, semi-annual and annual reports are sent to the Veterans Affairs Central Office (VACO) and VAMCs. Provides tracking of patient-, program-, and vendor-specific information. Provides VAMCs authorization capability for individual or batch payments and the functionality to re-initiate previously rejected payments. Provides the cost and quantity of non-VA inpatient and outpatient care given to Fee for Service eligible veterans. Provides geographic distribution of Fee for Service providers, and the distance of these providers from the veterans. Provides online reporting capability. Several reports assist in the management of the FEE program at the VAMCs and identify workload incurred by each Primary Service Area (PSA). 23VA163	HEALTH CARE
3155	FFPS (Funding Fee Payment System)	FFPS is a component of PAY.GOV. It is used to report VA Home Loan funding fees to Treasury, automate collection of funding fees, and report the funding fees to VA. The major portion of the application is operated and hosted by Treasury.	FINANCE
3157	Federal Health Information Exchange (FHIE)	It provides the VA with access to the veteran's previous health information. FHIE supports the one-way transfer of historical data on separated and retired military personnel.	MEDICAL

Syste m Id	System Name	System Description	Entity Name
3170	Foundation Information for Real Property Management (FIRM)	The Foundation Information for Real Property Management (FIRM) system was developed by the General Services Administration (GSA) to help federal agencies manage their real property assets. Inactive, replaced by SF.	ASSET
3173	Financial Management Information System	FMI is the primary financial accounting and reporting system for VA's Veterans Canteen Service (VCS). VCS manages over 170 canteen locations around the country, providing retail shops, pay phone services, food service, and other services.	FINANCE
3175	Foreign Medical Program (FMP)	The Foreign Medical Program (FMP) is a healthcare benefits program designed for US veterans with Veterans Affairs-rated service-connected conditions who are residing or traveling abroad (Canada and Philippines excluded).	HEALTH CARE
3180	Federal Procurement Data System	Data collection and report system that receives input via the FALCON system from all VA facilities on all VA-executed contracts.	ACQUISITION
3184	Financial Reports System	Provides customer-friendly menus and online help. FRN provides Windows-based reports, graphs, and text files from the FRN database which can then be downloaded to a local PC or network. Also known as PC FRS.	FINANCE
3189	Fiscal Menu System	Provides an array of FMS, General Ledger, PAID, and CDR financial reports. FMS, CDR, and General Ledger reports contain non-sensitive data available to all AAC customers. PAID reports contain sensitive data available only to authorized customers.	FINANCE
3190	General Council Legal Reporting System	GC LAWS is a comprehensive software package to accommodate enhanced legal case-matter tracking and workload reporting for the Office of the General Counsel and all Regional Counsel field offices.	CLAIM

Syste m Id	System Name	System Description	Entity Name
3191	Geographic Distribution Expenditures	System tracks VA expenditures geographically	MANAGEME NT
3199	Guaranteed/Insured Loan System	Maintains a detailed statistical master record for each guaranteed or insured loan closed by VA since the beginning of the VA loan program in 1944.	SERVICE
3208	Geriatric Research, Education and Clinical Centers (GRECC) - Hines	The Geriatric Research, Education, and Clinical Centers (GRECC) database tracks information on administrative functions, Personnel, Research awards, Publications, Clinical programs, Continuing education, Outreach and Trainee activities	MEDICAL
3209	Gravesite Reservation System	Provides a file of gravesite reservations for dependents of veterans. The system is designed to produce correspondence to be mailed to each reservee requesting confirmation of their intent to use the reserved gravesite.	MEMORIAL
3210	Gulf War Registry (GWR)	The Gulf War Registry (GWR) is a dataset of veterans who have participated in the Persian Gulf War, Operation Iraqi Freedom and had a GWR examination at a Department of Veterans Affairs (VA) medical facility.	MEDICAL
3213	Home Based Primary Care	The Home Based Primary Care (HBC) database receives and compiles data from local Hospital Based Home Care (HBHC) The primary purpose is to provide Home Based Primary Care management with case-mix, caseload, and other performance information.	HEALTH CARE

Syste m Id	System Name	System Description	Entity Name
3220	Health Eligibility Center (HEC) System	The Health Eligibility Center (HEC) is responsible for determining eligibility of veterans for VHA medical care. The HEC is the authoritative source on Veteran Eligibility and subsequent Enrollment. To be enrolled, a veteran must meet basic eligibility criteria. The HEC gathers all the information needed to make eligibility decisions and records and processes the information using the HEC System. The HEC also: • Validates Social Security numbers from the Social Security Administration • Verifies incomes from the Internal Revenue Service and Social Security Administration • Receives information from VBA on veterans to determine eligibility and enrollment assignment • Is the authoritative source and Data Steward for Demographic, Eligibility, and Enrollment data. This does not include Patient Identity elements. • Provides Business oversight to all software products related to Registration, Eligibility and Enrollment. • Shares Eligibility and Enrollment Data with all sites that have treated the veteran. • Is the authoritative source for Eligibility, Enrollment, and Income Verification Matching. • Validates social security number of veterans. • Prioritizes all enrollees and confirms their eligibility for the VHA medical program. 89VA19	HEALTH CARE
3224	Hepatitis C Case Registry	A Class I VistA software application that tracks the instance of Hep C in patients.	MEDICAL
3226	Hepatitis C Local Registry	Used to register Hepatitis C cases	MEDICAL
3228	Health Eligibility Reports	Uses the Master Veteran Record (MVR) to match veteran's social security number or VA claim numbers through various databases and produces report used to determine veterans' eligibility for VHA medical treatment.	TECHNOLOG Y

3447	Monthly Program Cost Report (MPCR)	The Monthly Program Cost Report (MPCR) replaces the Cost Distribution Report (CDR) in providing summary information about Veterans Affairs costs, Full Time Equivalents (FTE), and workload (number of patient bed days, outpatient clinic stops, etc.).	MANAGEME NT
3449	Master Patient Index	The Master Patient Index (MPI) database is the primary vehicle for assigning and maintaining unique patient identifiers. A gateway in VISTA establishes connectivity between systems and patient registration processes.	PERSON
3450	Military Personnel Registry	The Missing Patient Registry (MPR) system is a web-based system designed to assist medical center personnel in tracking and locating patients reported as missing.	MEDICAL
3451	Missing Patient Register (MPR)	The Missing Patient Registry (MPR) system is a web-based system designed to assist medical center personnel in tracking and locating patients reported as missing.	MEDICAL
3452	Mammography Quality Standards VA (MQS VA)	The Mammography Quality Standards VA (MQS VA) database contains specific facility, VISN and system wide mammography information used to monitor and analyze the VA's achievement of and adherence to national mammography quality standards. It contains data for the tracking, trending and monitoring of accreditation and certification of facilities participating in the VHA Mammography Program. Information is obtained from a ProClarity Cube (Radiology)(DSS)extract and sent to the database on a monthly basis. This information details how often mammography is performed and in which facility and VISN, based from CPT code nomenclature. Provider specific information and related pathology data maybe available through future re-hosting roll-up features. Specific items include, but are not limited to: Current Procedural Terminology (CPT) code(s); medical facility; date of procedure(s); types of imaging procedure(s) and/or biopsy(ies) performed and the facility performing the procedure(s). While the American College of Radiology (ACR) is the primary accrediting institution for all mammography suites in the country, it is the sole accrediting institution for the VHA mammography sites. The ACR independently gathers information from all VAMCs with on-site mammography and sends information weekly to the MQS VA. Thirty-two VHA sites are accredited and certified. The ACR uses the information to determine clinical image quality, standards compliance, equipment functional parameters, etc. as a basis for awarding accreditation. The MQS VA data is used to monitor the equipment performance, staff Quality Control (QC) and Quality Assurance (QA) requirements. Accreditation requires the review of clinical images, staff credentials, phantom image assessment, etc. triennially with annual updates. Certification, on the other hand, requires the facility to maintain	PATHOLOGY

Syste m Id	System Name	System Description	Entity Name
		accreditation, obtain an annual medical physicist survey of mammography equipment and undergo an annual inspection conducted by the Food and Drug Administration (FDA). The MQS VA data allows the Diagnostic Services Strategic Healthcare Group (DSSHG), which certifies mammography facilities, to notify the VAMCs when their performance reaches levels that may cause substandard images resulting in the potential loss of accreditation and certification. An enhancement to the database has been implemented that adds the results from the annual on-site FDA inspections of VAMC mammography suites. The FDA will send to MQS VA the inspection/test results and the results are added to the database. This will allow the MQS VA to notify VAMCs of identified deficiencies and assure that issues affecting quality mammography are corrected. Provides tracking and trend analysis for the VHA Mammography Program. Provides identification of data reporting inconsistencies. Provides notification to VAMCs and VISNs on status of accreditation and certification issues. Allows information to be viewed by facility, VISN, patient, and CPT code. Provides monitoring of mammography standards test results performed by the FDA. 121VA19	
3453	Medical Registry System	Facilitates access to medical records retired from military medical treatment facilities.	TECHNOLOG Y

Syste m Id	System Name	System Description	Entity Name
3473	Material Safety Data Sheets Database (MSDS)	The Material Safety Data Sheets (MSDS) database is a storage and retrieval facility for all Material Safety Data Sheets pertaining to the VA. Mandated by Occupational Safety & Data Sheets pertaining to the VA. Mandated by Occupational Safety & Data Sheet information (OSHA), MSDS must be produced and made available by every chemical manufacturer for every chemical they make. Data sheet information includes the chemical's ingredients, properties, guidelines for proper storage and handling, disposal information, and first-aid instructions in case of a spill or accidental contact. All VA facilities that have chemicals on their premises are required to keep MSDS in a binder placed in a service area that provides quick access to important chemical information for emergencies. Information for the MSDS system comes from the chemical manufacturers, VA facilities, and from subscription services that offer MSDS details. New information is added to the system daily. When MSDS have been in the system over two years, the manufacturers are contacted to determine if any information has changed. All MSDS are retained for a thirty-year period from their date of issue. The users of this database include the Safety Office of each VA facility and the Industrial Hygienist (IH) from each Safety Office. Provides users access MSDS database via phone dial-in or through the World Wide Web. Provides copies of material safety data sheets via fax machine.	DIRECTIVE

Syste m Id	System Name	System Description	Entity Name
3564	Non-VA Hospital System (NVH)	The VHA pays for care provided to VA beneficiaries in non-VA hospitals through its contract hospitalization program as mandated by Congress in the late 1980s. The NVH software captures the patient's Demographics, Provider, Hospital Name and Location, Medicare Provider Number, Diagnoses and Procedures for which the patient received care during his/her inpatient stay. The data is received from either the patient or the medical center providing the care - normally on a UB-92 form. The billing office employee enters the information into VISTA and sends information to the AAC. The non-VA hospitals are reimbursed at Medicare rates based on the Prospective System (PPS). PPS uses the appropriate Diagnostic Related Groups (DRGs). Each DRG has a different rate-adjusted reimbursement based on the regional and urban/rural designation of the provider non-VA Hospitals. NVH is housed at the AAC and uses software developed by the AAC in conjunction with 3M and the Center for Medicare and Medicaid Services (CMS). It is a batch system written in COBOL, ALC, and SAS. Processing occurs daily. Provides cost and DRG information to the Veterans Affairs Medical Centers for private care hospitalizations. Provides reports for the Medical Administration and Fiscal offices.	HEALTH CARE
3610	OQP Clinical Practice Guidelines Internet site	Internet site to disseminate CPGs and take surveys.	DIRECTIVE

Syste m Id	System Name	System Description	Entity Name
3623	Personnel and Accounting Integrated Data (PAID) System	Department of Veterans Affairs (VA's) automated payroll system and serves as the central system for support of human resources and payroll functions.	FINANCE
3625	Parkinsons Disease Research, Education, and Clinical Centers Registry (PADRECC)	121VA19	MEDICAL
3626	Patient Assessment File	The Patient Assessment File (PAF) database compiles the results of the Patient Assessment Instrument (PAI) questionnaire filled out for intermediate care VHA patients.	MANAGEME NT
3636	Payment History File	An automated Payment History File allows the retrieval of payment and returned payment information for all the benefit systems that are paid through the BDN and VetsNet.	EMERGENCY REGIME

Syste m Id	System Name	System Description	Entity Name
3637	Pharmacy Benefits Management (PBM)	The Pharmacy Benefits Management (PBM) is a database that collects information on medication dispensed to both inpatient and outpatient veterans who receive care from the VA. Information for the PBM database is extracted from a number of files found within the VistA environment. Monthly, the extracted information is sent via MailMan messages from all VAMCs to the Strategic Healthcare Group(119D). At the PBM, quality assurance procedures are performed on the data and local pharmaceutical names are converted to common names before the information is entered into the PBM database. PBM database users include the VAMCs, the Veterans Integrated Service Networks (VISNs), and the Chief Network Officer (CNO). Provides a national database containing information on drug dispensing at VAMCs. Provides reporting at local, regional, and national levels for VAMCs and VISNs. Provides monthly, quarterly, and annual reports to the VAMCs and VISNs. Provides the translation of local pharmaceutical names to common names. Provides confirmation to VAMCs that MailMan messages have been received successfully by the Hines facility.	MANAGEME NT
3644	Patient Care Management Module	Class I vista GUI application that enables staff to create and manage teams of providers and patients.	HEALTH CARE
3645	Program Cost Reporting	Monthly report provides VHA management with information on full time equivalents (FTE), personal services, and other costs. MPCR offers capability to compare facility costs to nationwide per-unit costs.	MANAGEME NT
3650	PAID	The VA e-Payroll project involves development of multiple interfaces between the AAC and DFAS, and extensive changes within VA's current PAID application and VHA's T&A application, to interface with the Defense Civilian Pay System (DCPS).	TECHNOLOG Y
3658	PFCS Audit Compliance Module	Provides reporting and data mining for compliance, coding and billing, and daily workload and coding tool for PCE encounter	MANAGEME NT

Syste m Id	System Name	System Description	Entity Name
3659	Pay For Performance	GAO front-end system generates a dataset for a PC-based application used by GAO in support of annual merit salary increases. Sends merit increase transactions to the payroll/personnel system at the National Finance Center (NFC) once a year.	RESOURCE
3665	Pharmacy Insurance Claims	Automates submission of prescription claims using the HIPAA-mandated National Council of Prescription Drug Program (NCPDP), Telecommunication Standard 5.1. Vitria.	CLAIM
3669	Patient Index Registry System	Maintains Patient Index Registry System records and provides the physical location of medical folders for separated patients. The folders are kept at the National Civilian Personnel Record Center.	TECHNOLOG Y
3673	Program for Locality Adjustments for Nurses	PLN is a software program designed to assist human resource offices in developing pay schedules for the Nurse Locality Pay System. It is used to develop pay schedules for RNs and CRNAs.	RESOURCE
3674	Presidential Memorial Certificate	Initiates requests on a family's behalf and prints the Presidential Memorial Certificates that express, from the President, the nation's gratitude for a veteran's honorable service to the next of kin and other family members of deceased veterans.	SERVICE
3675	Payroll Management Report for GAO	The GAO Payroll/Personnel Management Reporting System (PPMRS) is a set of periodic reports written in SAS that are generated from a biweekly interface of personnel data provided by the GAO National Finance Center (GAO-NFC).	MANAGEME NT
3676	Property Management System	The Property Management System is responsible for the maintenance and sale of all VA properties.	FACILITY
3679	Purchase Order Management System	Manages the VCS (Veterans' Canteen Service) inventory for 170 sites across the United States and Puerto Rico. VCS provides quality retail items, food, and services at reasonable prices to patients, caregivers, and visitors of VAMCs.	ACQUISITION

Syste m Id	System Name	System Description	Entity Name
3680	Prisoner of War	As part of Ex-Prisoner of War Medical Evaluation Program, provides a complete medical and psychiatric evaluation for Ex-POWs. System evaluates effectiveness of this program and provides information on health care provided and compensation received.	PERSON
3729	Patient Treatment File (PTF)	This database is part of the National Medical Information System (NMIS). The Patient Treatment File (PTF) contains a statistical record for each inpatient care episode provided under VA auspices in VA and non-VA facilities nationwide.	MANAGEME NT
3767	Quick Card	Recording results of customer feedback	MANAGEME NT
3771	QuickScript	An automated product that automates prescription filling processes.	TECHNOLOG Y
3775	RADWISE	Commercial Radiology Recommendation System	CLAIM
3777	Resident Assessment Instrument/Minimum Data Set	Electronic system used to collect and transmit comprehensive MDS assessment data to Austin. Operates under the JCAHO long-term care standards.	TECHNOLOG Y
3790	Remote Automated Laboratory Systems	Allows for the uploading of blood glucose monitor data from remote locations into VistA laboratory package.	LABORATOR Y
3798	Root Cause Analysis Software	This software tool is used by the patient safety officers.	PROGRAM

Syste m Id	System Name	System Description	Entity Name
3799	Report of VA Medical Training Programs	The Report of VA Medical Training Programs Database is used to track medical center health services trainees and VA physicians serving as faculty. The database also tracks the number of U.S. and international medical residents on-duty at a VAMC. Information in the database comes from all VAMCs that have residency programs. The Office of Academic Affiliations distributes worksheets and memos to participating VAMCs annually. VAMC personnel enter the information electronically into the database located at the Academic Information Management Center (AIMC) in St. Louis, Missouri. The main user of this database is the Office of Academic Affiliations which uses the reports from the system to assist in its decision making. Provides information for making staffing decisions. Provides total count of full and part time VA physicians serving as faculty. Provides the number of medical students by medical center. Provides a total count of foreign medical students and graduates. Provides medical graduate reporting by specialty (medical, geriatric, surgery, etc.) and sub-specialty.	TRAINING
3800	Research and Development Information System	Research and Development Information System (RDIS) is the data collected from VAMCs on all VA research projects. It includes project data, funding data, and investigator data from VAMCs.	MEDICAL
3802	Recertification	Processes Treasury returned payment data and sends return payment data transactions to all BDN payment systems.	SERVICE
3804	Reg Search	Distributed Solutions inc software that assists in contract assembly	DIRECTIVE

Syste m Id	System Name	System Description	Entity Name
3805	Resident Engineer Mgmt System 2000 (REMS2000) / Paragon 6	Resident Engineer Management System 2000 (REMS2000) allows Resident Engineers to manage and administer construction projects and the numerous contracts, both design and construction, associated with those projects. The database is used to create reports that facilitate the execution and completion of these contracts. REMS2000 replaced the Resident Engineer Management System (REMS) in 1999. This database is used to manage and administer construction projects at each resident/engineer project site. REMS2000 runs on a commercial application called Paragon, that is owned and managed by Via Novus in Oakland, CA. The system is available nationally via the Internet connection to Via Novus and a Citrix client connection configuration. Stored information includes: • contract modifications • product submittals • architect/engineer site visits • testing lab funding • contract funding • government furnished equipment • contract information requests • costs • description of the project under construction, and • inspection details Provides complete Project Management data capture for creating and tracking contract modifications and budget for the project. In addition, provides a means for tracking Requests for Information (RFI's), product submittals, etc. associated with typical Resident Engineer management of an assigned contract. By comparing actual obligations against project budgets and potential costs associated with additional potential obligations, a 'risk analysis' can be accomplished to provide forecasting of projected project costs. The fact that the system is available nationally via a Citrix client configuration, remotely located program and project managers have real-time access to the project and contract data as it is collected and edited by field staff. Supports budget reporting and tracking by specific construction project.	ACQUISITION
3810	Residential Home Care	Supports administration of care of veterans in private residences or other privately operated care facilities. Quarterly reports describe the home care facility in categories such as number of beds, average length of stay, and average rate paid.	HEALTH CARE
3815	Records Locator System (BIRLS)	Primary veteran record database application used to process online inquiry and update transactions to provide VA customers with verified veteran data.	SERVICE
3818	Records Management Support	Technical support including record retrieval and storage, static Web page design to describe vault activities, etc.	TECHNOLOG Y

Syste m Id	System Name	System Description	Entity Name
3822	Remote Order Entry Software	The Remote Order Entry System (ROES) is the front end of the Denver Distribution Center's (DDC) supply chain/order fulfillment production system. ROES is used by VA clinicians to place orders for certain types of medical products and services that are maintained under contract by the DDC. The most substantial product line handled through ROES is custom hearing aids. As implied by the name, custom hearing aids are highly specialized devices custom made for individual veteran patients. The ROES application and database are tailored for efficiency in ordering these unique devices and other items available from the DDC. Other product lines handled through ROES include stock hearing aids, hearing aid accessories and batteries, prosthetic items, aids for the visually impaired, and assistive devices. A line of service provided by the DDC and facilitated by ROES is that of hearing aid repair. The ROES application and database tie together the DDC enterprise business functions of contracting/acquisition management, order fulfillment, distribution management, finance, and product life cycle support. Extensive order tracking, serialized device registration, patient/device history, and sales/financial reporting are also supported by the database. ROES uses advanced technologies and practices in software design, supporting hardware platform, database management, and network integration. It integrates a web-based application architecture with a VistA environment, obtaining an optimum mix of decentralized VistA interfacing with centralized data management. The database is optimized for the DDC's progressive procurement and distribution practices, advanced general business practices, and current VA regulations. 121VA19	ACQUISITION
3860	SF Health Outcomes TM Scoring	Saves you the time it takes to write the code necessary to score questionnaire items, scales and summary measures, eliminates the chance of making scoring errors, and adds noteworthy features that are not otherwise available	TECHNOLOG Y
3874	Space Information System	An NR5-related system that provides the National Archives and Records Administration with warehouse space availability information. (See NR5).	EMERGENCY REGIME
3876	Web Application (Service Medical Record)	Return records associated with a DoD mobilization to sites determined by DoD within 72 hours of notification that a service member/veteran has been recalled to active duty.	DIRECTIVE

Syste m Id	System Name	System Description	Entity Name
3895	National Patient Safety Database	Patient Safety Program	MEDICAL
3901	Spot	VA Incident Reporting software used by patient safety manger	MEDICAL
3911	Suggestion Tracking	The application tracks suggestions and awards for employees meeting the requirements.	RESOURCE
3949	Time and Attendance System for GAO	Combines the time and attendance transactions from all GAO organizations into a common file.	RESOURCE

3973	Training & Education Management System	Employee training record tracking system.	TRAINING
3987	Threshold	Police Physical Security Application	EMERGENCY REGIME
3994	Tracking Continuing Education	Primary management information system used by VALU and EES to track budget and resource utilization, production of training products, and tracks participants of face-to-face training conducted/sponsored by VALU/EES.	TRAINING
4004	Task Tracking System	An NRS5-related system that provides the National Archives and Records Administration with the ability to track workload.	EMERGENCY REGIME
4017	Universal Product Number (UPN)	The Universal Product Number (UPN) is used to uniquely identify products used in the supply chain. The UPN is placed as bar code symbols on products to enable users of the products to readily identify the product's characteristics.	INVENTORY

Syste m Id 4029	System Name	System Description	Entity Name
	VA HRC Consolidated Co- payment Processing Center	The Consolidated Co-payment Processing Center (CCPC) is a data file maintained at the Austin Automation Center and was created to enable the printing and mailing of patient billing statements.	FINANCE
4030	VA HRC Information Warehouse	The VA HRC IW web site preserves the information from the information warehouse which was part of the HR LINK\$ Employee Self Service (ESS) application. The Employee Self Service application was hosted on servers at the Austin Automation Center.	RESOURCE
4031	VA Learning Catalog	VA Learning University (VALU) sponsored web-based catalog of national level learning opportunities for VA staff. NOTE: The VA Learning Catalog will be replace by the catalog functionality in the VA LMS by late FY08.	TRAINING
4033	VA Position Description Library	The site has over five hundred position descriptions (PD's) in it and will have the capability for additional PD's to be added. HR management will control what PD's can be added and will have the capability to inactivate them if they become outdated.	RESOURCE
4036	VA Online Certification of Enrollment	A web based application used by training facility Certifying Officials to submit electronic enrollment certification forms to VA	TRAINING

Syste m Id	System Name	System Description	Entity Name
4037	Veterans Administration Central Cancer Registry (VACCR)	The Veterans Administration Central Cancer Registry (VACCR) receives and stores information on cancer diagnosis and treatment constraints compiled and sent in by the local cancer registry staff at each of the 120 VAMCs that handle cancer patients. The information sent is encoded to meet the site-specific requirements for registry inclusion as established by several oversight bodies, including the North American Association of Central Cancer Registries, the American College of Surgeons' Commission on Cancer, and the American Joint Commission on Cancer, among others. The information is obtained from a wide variety of medical record documents at the local medical center pertaining to each VHA cancer patient. The information is then transmitted to the VACCR. Details collected include site, group, histology, general summary stage, age at diagnosis breakout, diagnostic confirmations, etc. Reports based on this highly sensitive information is only available to senior VHA management. Provides summary reports on VHA cancer patients annually and as requested by VHA management. Stores large quantities of data on VHA cancer patients derived from patient medical records in accordance with national cancer industry guidelines. 121VA19	MEDICAL
4039	Veterans Appeals Control and Locator System	Appeals creation, development and tracking system. Access to VACOLS allows RO personnel to view, locate, update and track the status of appeals cases submitted to the Board of Veterans Appeals	APPEAL
4043	VA Longitudinal Online Research Database	The VALOR Database fulfills three important objectives essential to the research mission of the Center for Health Equity Research and Promotion.	MEDICAL

4075	VHA IT Tracking System	The IT Procurement Tracking process is designed to manage VA IT expenditures to ensure compliance to IT Security, compliance to Enterprise Architecture (EA) standards, and efficient management of IT resources.	INVENTORY
4153	Veterans Health Gateway (DSHI)	Algorithms for the medical protocols used in telephone care nursing	TECHNOLOG Y
4161	Veterans Information Portal	The Veterans Information Portal (VIP) provides a gateway through which Veterans Benefits Administration (VBA) employees, lenders, appraisers/inspectors, and property managers can access certain VBA applications.	TECHNOLOG Y
4172	VISTA	HOSPITAL INFORMATION SYSTEM	HEALTH CARE
4174	Veterans Information Systems Technology Architecture	VHA Health Information Systems deployed at all 10 VISN 16 Medical centers	TECHNOLOG Y

Syste m Id	System Name	System Description	Entity Name
4176	Veterans Health Information System (Kernel)	The VistA (Legacy) kernel is the operating system software platform and the technical infrastructure (associated with clinical operations) on which the VHA health care facilities operate their VistA-related software applications. This "portability layer" includes VistA Shared Services (Duplicate Record Merge, HL7 Messaging, List Manager, MailMan, the Master Patient Index (MPI) and Patient Demographics (PD), the My HealtheVet portal, National Health Exchange (NHE), Patient Data Exchange(PDX), Remote Procedure Call (RPC) Broker, and VistaLink (including Vitria)), VistA system management tools, single sign-on, and the VA Fileman module (VistA Database). The VistA kernel runs in any Menvironment (ANSI X11.1-1995). VistA incorporates the capabilities of its predecessor, DHCP (Decentralized Hospital Computer Program). The VistA kernel supports numerous "VistA packages" that are organized by high-level business functions (Health Data; Registration, Enrollment, and Eligibility; Health Provider; Management and Financial; and Information and Education). Each package contains "VistA modules" each of which are a VA major application system performing essential VA mission (Health Care) functions. (Note that the VistA monograph terminology sometimes interchanges "package" and "module"; however, the Baseline System Inventory always applies the phrase "VistA module" to each of these major application systems.) The current VistA-site master spreadsheet indicates that there are 128 VistA kernel systems running at the VA Medical Centers as well as 19 other VistA systems running at various sites. An additional 49 pre-VistA legacy applications (identified as VistA) were developed before the current infrastructure and only store clinical and financial data.	TECHNOLOG
4220	Virtual Learning Center (VLC)	The Virtual Learning Center (VLC) was developed as a systematic mechanism for VA employees to share innovations and successful/best practices to allow others to have easy access to this information saving time and resources.	TRAINING
4229	VHA Work Measurement	The VHA Work Measurement (VWM) database is an interim solution for collection of workload data which would not be available on a national level after completion of the Automated Management Information System (AMIS) Elimination project.	MANAGEME NT
4231	Web Automated Reference Materials System	A web based application created for use by the public and VBA personnel when not on station. The content mirrors the ARMS application.	DIRECTIVE

Syste m Id	System Name	System Description	Entity Name
4235	Workers Compensation Information System for Department of Veterans Affairs (DVA)	Workers Compensation Information System for DVA is a database of worker compensation injury and illness claim data filed with the Department of Labor (DOL).	RESOURCE
4236	Worker's Compensation Information System	WCP maintains a database of worker compensation claim data that has been filed with the Dept of Labor. Included is case master data as well as medical bill payments to care providers and compensation to those eligible.	DIRECTIVE
4242	Web Expanded Lender Information	The WebELI system provides VACO and ROs with a complete record of both approved and non-approved lenders.	ORGANIZATI ON
4244	VBA Intranet Application Logon Screen	Administrative application used to approve users for WebLogon's intranet applications. Used to grant access levels and to reset locked accounts and passwords for WebLogon.	TECHNOLOG Y
